Cover Page

- University Name
- Name of the School
- Name of Department
- Title of the Experiment
- Names of group members and their REG Numbers

From: John Doe BSC/ABC/NN/YY

: Jane Doe BED/ABC/NN/YY

- Name of Supervisor

To: Foo Bar

Introduction

A brief Discussion of the Experiment and relevant theory.

Aim of Experiment

The main objective of the experiment should be stated.

Methodology

Explanation of what is exactly done in the experiment and how materials were used in the experiment.

Results and Discussion

Collected data should be presented, graphs should be plotted, all calculations should be made and all questions under that section should be answered as the students analyse and interpret the collected data.

Conclusion

Summary of what the experiment was all about and relating the findings to the aim of the experiment, mentioning factors that may have affected (negatively or positively) the obtained results and the experiment as a whole.
